Reg.: consultation on the "Methodology for integrating Baltic Pipe in the Danish Market Model"

Dear Sir or Madam,

GAZ-SYSTEM S.A. being the gas transmission system operator in Poland and Energinet's Gas TSO partner in the Baltic Pipe project welcomes the opportunity to express its views on the draft "Methodology for integrating Baltic Pipe in the Danish Market Model".

First and foremost, we would like to indicate that the consulted methodology is in our opinion dedicated to the planned integration of the North Sea offshore pipeline into the current Danish Market Model and not the whole Baltic Pipe as currently indicated. Thus, both the title of the document and the whole methodology shall be accordingly revised by making a reference only to the integration between the North sea offshore pipeline/EPII Branch Pipeline or respectively new North Sea Entry Point and the Danish onshore transmission system. At the same time references to the whole Baltic Pipe project which encompasses also the Baltic Sea offshore pipeline and Onshore Poland and are not subject to the future methodology shall be replaced or withdrawn.

Consequently, we also propose to delete from the document the whole part referring to new IP Faxe between Denmark and Poland i.e. from point 4.1.1. to 4.1.1.3. as being out of scope of the methodology and still under discussion between Energinet Gas TSO and GAZ-SYSTEM, both with regard to capacity allocation in line with CAM NC and selection of the capacity booking platform.

Yours faithfully,

Gas Market Development Division

Deputy Director

Piotr Kuś
